## SF800-LR Soldering Flux

**THE ZERO-HALOGEN,  
LOW RESIDUE AND  
LOW SOLID LIQUID  
FLUX FOR  
PHOTOVOLTAIC  
ASSEMBLY**

### SF800-LR IS A ZERO-HALOGEN, LOW-RESIDUE, LOW-SOLIDS, ORGANIC-BASED LIQUID FLUX DESIGNED SPECIFICALLY FOR TABBING AND STRING- ING APPLICATIONS, FEATURING:

- Extremely low residue - minimal post cleaning after soldering thereby maintenance of equipment is reduced
- Low Solids (around 1.5%)
- Excellent Peel Force Resistivity
- Fast Wetting
- High Reliability Liquid Flux
- Suitable for dipping and spraying application methods
